

Introducing

FASCETS CANADA

Fetal Alcohol Spectrum Consultation
Education and Training Services

Training & Education

*on the Neurobehavioural Model
for the development of
successful accommodation
for people with Fetal Alcohol
Spectrum Disorder (FASD)*

Consultation

*services on the
Neurobehavioural Model are
available for individuals,
families, agencies or for
larger community groups.*

Creating person-centred accommodations that really work!

*Our goals are to increase understanding, reduce frustration and burnout,
and support the development of accommodations while building on strengths*

*The Neurobehavioural Model is based on the work of Diane Malbin
and is supported by over 50 years of research on the brain!*
